Police covert utility pole surveillance cameras  
Law enforcement covert pole cameras  
Police surveillance equipment  
Pattern of life  
Covert traffic cone  
Covert traffic barrel  
IP video surveillance system

## **The Rabbit: Ultra Low Power, Cylindrical Outdoor Covert Cellular PTZ Camera System**

Small, versatile, covert cellular video surveillance system is Internet accessible, provides long run time on small external battery, has remotely controlled 1080 HD true PTZ camera, and can be used exposed or in a multitude of user-built concealments.

**Preferred for special operations. Specifically designed for use in small, curved concealments on the ground.**

### Benefits

- **Complete** ultra low power, cellular digital 1080 HD video surveillance system in a small enclosure with full remote control, and access to its live and recorded video, from Internet; just add small external battery for **long** run time
- Small, rugged, weatherproof, cylindrical housing can be exposed to elements or placed in wide range of user's outer rectangular or cylindrical, horizontal or vertical camouflage housings to suit local needs; cylindrical shape fits well in both curved- and flat-wall plastic shells
- 5 MP (not just 2 MP) image sensor enables video to have proper orientation and 1080 HD resolution in any 90-degree horizontal or vertical orientation of cylinder
- Unique, patented, **forward-pivot pan-tilt movement** provides camera movement and day/night operation with a small glass camera window for ease of concealment and small viewing window in user's housing
- Continuous sharp 1920x1080 @ 10 fps video recording on 384 GB internal high reliability solid state storage reduces cellular data usage and avoids ext. recorder
- Live video stream compatible with most VMS's
- Sharp, low distortion, 13-85 mm remotely controlled zoom lens enables user to read license plate at up to 450 ft at 4 dpi, or face at up to 300 ft at 6 dpi
- **Ultra low power dissipation**, typ. 0.8W idle, 2W 1080-HD video capture (modem off), 4W fully active, enables a small, external, 12V 40AH LiFePO4 battery (not incl.) to provide approx. 5 days fully active, and enables many small outer shells to be used with only a small battery
- Small size and light weight, including external battery, for ease of transport and placement in outer housings
- Comprehensive power (not just voltage) monitoring for most-accurate, battery run-time-remaining estimates
- Uses Boundless' cloud-based Portal for software updates, power management, status reports, APPS...
- Much more than live and internally recorded video, its time-saving **APPS** include: **pattern-of-life Rapid Re-view Integrated Time-lapse™**, to view an hour's video over the air in one minute with very little data; **Image Timeline; Visual Presets;** and **PTZ Movement Sliders**

Custom built and configured in USA

**Rugged, weatherproof, sealed aluminum housing**

12" Whip and Low Profile 4G LTE cell antennas suit wide range of user's concealments

Far more capable but smaller and much lower power than an IP PTZ pole camera, it's a **versatile turn-key system** in a sealed aluminum 4"D x 7"H housing. Use exposed as a utility pole camera system or in an outer, rectangular or cylindrical, horizontal or vertical, non-metallic shell. 3#. Mimics 3.5" PVC conduit. Appearance varies.

## Many Ways to Conceal Boundless' *The Rabbit*: Ultra Low Power, Cylindrical Outdoor Covert Cellular PTZ Camera System, and a Small Battery Preferred for Special Operations – No Utility Pole Required

In non-metallic tall traffic cones, traffic channelizer cones and bollard covers, with at least 4" ID at the vertical center, and traffic barrels and storage drums

In non-metallic, hollow fence posts and bollard covers with at least 4" ID

In passenger vehicle or roof carrier

In 4" ID or greater PVC pipe on roof, or inside service vehicle

In plastic drain or sewer pipe with at least 4" ID

Concealments not included

In non-metallic optical fiber splice tubes and broadband Internet enclosures

In faux rocks and logs

## Mount *Cylindrical Outdoor Covert PTZ Camera System* horizontally or vertically for wide utility
