

Custom built and configured in USA

Covert Traffic Cone Deployment System™ for The Rabbit™

Rapidly deploy a battery-powered outdoor covert cellular PTZ camera system – no utility pole, no AC power required

What is The Rabbit™ ?

- **The Rabbit™** is Boundless Security's **ultra-low-power, outdoor covert cellular PTZ camera system**. It operates for extended periods on battery power and can be deployed on a utility pole or concealed on the ground.
- The **Covert Traffic Cone Deployment System™** houses **The Rabbit™** in a self-contained unit that can be placed on the ground and be online in minutes.
- **The Rabbit™** provides live video, internal video recording, and PTZ control anywhere there's cell service.

Runtime with integrated battery

- ~1 week continuous operation (24/7)
- Up to ~2–3 weeks with scheduled operation

Key Capabilities

- **No infrastructure required** — no utility pole, no wiring, no AC power
- **Rapid deployment** — operational in minutes
- **Continuous video** — not motion-triggered
- **Records HD video internally** — not dependent on cellular quality
- **Long-range imaging** — 10X zoom, license plates up to ~450 feet
- **ONVIF-compatible** — integrates with standard VMS and AI platforms

Built for real-world deployment

- Rugged, sealed construction keeps out rain, dirt, and ground moisture
- Hard-coated, scratch-resistant polycarbonate camera window
- Standard 42" traffic cone — naturally unobtrusive in public environments

Important

Designed for use with **The Rabbit™** (sold separately)

It goes where the case goes.

No utility pole. No AC power. No setup delay.

Backside of **Covert Traffic Cone Deployment System for The Rabbit™**. 42" high to bottom of handle. Approx. 20 lb with battery and camera (rubber base not included). Base shown for illustration only. Camera window not shown.
