

Rapid Deployment Covert Camera System

Grab-and-Go – live in minutes, not hours or days

Deploy a cellular outdoor covert PTZ camera system immediately – no waiting for pole installation. Self-contained, battery-powered, and ready when you are.

Why it matters

- Many incidents require **immediate visibility**
- Pole cameras take **hours to days** to deploy
- Officers need a system that is **ready now**

Key Capabilities

- **On scene and live immediately**
- **Grab-and-go** – take it with you as you respond
- **Flexible placement** – indoors or outdoors; ground deploy or elevate on vehicles or structures for improved visibility
- **Single-piece, self-contained** — no tripod, no external battery, no setup required, operates anywhere there's cellular service
- **Continuous video + internal HD recording**
- **Long-range imaging** — 10X zoom, license plates up to ~450 feet
- **ONVIF/VMS integration** — instantly deploy on scene with live view and PTZ control from **Real-Time Crime Centers**

Backside of **Rapid Deployment Covert Camera System**. 42" high to bottom of handle. Approx. 20 lb. not including rubber base. Camera window not shown.

Built for real-world use

- ~ 1 week continuous operation (24/7), longer when scheduled
- Rugged, sealed construction keeps out rain, dirt, and ground moisture
- Internal battery is easily kept charged without opening the unit
- Hard-coated, scratch-resistant polycarbonate outer camera window
- Standard 42" traffic cone — naturally unobtrusive in public environments

The Rabbit™ platform

- Ultra low power, outdoor covert cellular PTZ camera system designed for extended battery-powered operation
- Supports pole, ground, vehicle, and tripod deployment
- Sold separately or pre-installed, fully configured

It goes where the case goes™
